

MADDIPATI NAGASATYA DURGA MANEENDRA

+91 96762 50258 | Ankampalem | maddipatimaneendra@gmail.com | LinkedIn | GitHub

OBJECTIVE

B.Tech Computer Science & Engineering undergraduate (Batch 2027) skilled in Generative AI, Cybersecurity, and data analysis, with internship experience in AI development and security assessment. Proficient in Python, Java, Kali Linux, Power BI, MySQL and Excel, with hands-on projects including an AI chat assistant, Android penetration testing lab, and an IPL analytics dashboard analyzing 1,169 matches using pivot tables and data visualization — driven to build intelligent, secure, and data-driven solutions at scale.

SKILLS

Languages	C, Python, Java, HTML, CSS
AI	Generative AI, Groq API
Cybersecurity	Penetration Testing, Vulnerability Assessment
Data Analysis	Power BI, Excel, MySQL, Pivot Tables, Data Visualization
Tools	Kali Linux, Genumotion
Core CS	Data Structures, Algorithms, OOP, Database Management
Soft Skills	Problem Solving, Communication, Team Work, Critical Thinking, Time Management

INTERNSHIPS / EXPERIENCE

Cybersecurity Intern — 1Stop.ai MAY 2025 – JUN 2025

- Learned foundational Cybersecurity concepts including network scanning, information gathering, and vulnerability assessment through structured training.
- Built awareness of real-world attack techniques such as SQL injection, session hijacking, sniffing, and malware threats as part of guided coursework.
- Developed basic understanding of penetration testing tools, cryptography, proxies, and VPNs to support Cybersecurity analysis.

Generative AI with LLMs Intern — SkillDzire APR 2026 – JUN 2026

- Learned foundational concepts of Generative AI including the differences between AI, ML, and Deep Learning, tokenization, embeddings, and how Large Language Models work.
- Gained basic understanding of prompt engineering techniques such as zero-shot, few-shot, and role prompting through guided coursework.
- Built a simple real-time chatbot application using LLM API integration as part of structured hands-on training.

PROJECTS

Aura Vault — AI Chat Assistant | *Python, HTML, CSS, JavaScript, Groq API*

- Built a full-stack AI chatbot using Flask, Groq API, and SQLite with multi-user authentication and admin panel.
- Implemented file uploads, voice input, and markdown rendering with REST API having 11 endpoints.
- Deployed as a PWA with service-worker offline caching support on cloud platform.

Android Penetration Testing Lab | *Kali Linux, Genumotion*

- Set up a real mobile pentest lab using Kali Linux, Burp Suite, and ADB on InsecureBankv2 and Damn Vulnerable Bank.
- Identified 10 vulnerabilities including 2 critical-severity flaws (CVSS 9.8, 9.1) covering OWASP Mobile Top 10.
- Applied code-level fixes for SQL injection, IDOR, insecure authentication, and hardcoded credentials.

IPL Analytics Dashboard (2008–2025) | *Excel, Pivot Tables, Data Visualization*

- Built an interactive IPL dashboard in Excel analyzing match data across 18 seasons (2008–2025).
- Created pivot tables and charts for team win analysis, toss decisions, and season winners to enable data-driven insights.
- Visualized Top 10 venues, Man of the Match stats, and bat vs. field toss trends for quick performance overview.

Simple List — Task Manager | *HTML, CSS, JavaScript*

- Built a responsive To-Do List web app using HTML, CSS, and JavaScript with add, delete, and filter functionality.
- Implemented dark/light theme toggle and localStorage to persist tasks across page refreshes.
- Added real-time progress bar and animated UI for a smooth experience across all screen sizes.

EDUCATION

Aditya University, Surampalem, AP, India	2023 - 2027
Bachelor's, Computer Science	CGPA: 7.83

CERTIFICATIONS

Java	- Oracle
Python	- Cisco Networking Academy
Internet of Things	- NPTEL
Cybersecurity	- Google Cloud
SQL	- Oracle/IBM
AI	- Coursera
HTML, CSS & JavaScript	- Infosys Springboard
